

New 13a for the Consent Order as Amended (2016 document)

- a) The 2009 Consent Order as amended requires that additional surveying and sampling ~~of private and public water systems~~ be conducted ~~of private and public water systems~~. For each private and public water system that is sampled, where validated sampling results for PFOA are greater than 0.07 ppb and GAC treatment is offered, Chemours (or its authorized representative) will follow the elements of the Model Water Treatment Plan, which has been approved by EPA and is attached hereto as Exhibit A. This Model Water Treatment Plan has been developed to describe the manner in which treatment of drinking water at qualified locations will be implemented consistent with the requirements of the 2009 Consent Order as amended. Consistent with the requirements of Paragraph 42 of the 2009 Consent Order as amended, model water treatment plans for GAC treatment and for alternative treatment for both private and public water systems consist of a series of steps that must be completed sequentially for the implementation of treatment. In addition, post installation monitoring of the treatment systems and alternative treatment is included. The Model Water Treatment Plan in Exhibit A describes the current processes for implementation of treatment and post installation monitoring. Modifications to the Model Water Treatment Plan may be incorporated only if agreed upon by the EPA Region 3 case manager, the EPA Region 5 case manager, and the Project Director(s) at Chemours and/or DuPont (if appropriate). Modifications agreed upon by the EPA Region 3 case manager, the EPA Region 5 case manager, and the Project Director(s) at Chemours and/or DuPont (if appropriate) will be documented in a Revised Model Water Treatment Plan which will be considered as Exhibit A and will supersede the previously dated plan. A Revised Model Water Treatment Plan ~~that has been agreed to by EPA Regions 3 and 5, Chemours and DuPont (if appropriate), which followed the stakeholder agreements process~~ will not require an amendment of the Consent Order.

Commented [WJ1]: Does this mean discussions amongst Region 3, Region 5 and DuPont and/or Chemours? If yes, I think this will need to be reworded.

Commented [DKL2R1]: Please check revised wording.
